

## A100 KIOSK

# A100 KIOSK ADVANCED E-MEDIA KIOSK

*The A100 is a flexible and stylish kiosk, incorporating both keyboard and touchscreen.*

*Its clean lines and small footprint make it suited to a wide range of locations, particularly those where space is at a premium.*

The A100 is tough and durable, making it suited for use in industry as well as public installations.

The A100 can be secured to a worktop, wall, ceiling or exhibition stand with a universal stand fitting.

A range of additional peripherals can extend its use even further, including Voice over IP handsets and CD/DVD reader/writer.

**The A100's robust design makes it ideal for high traffic areas**

- Brushed Aluminium Case

### Optional Extras

- Trackball built into keyboard
- CD / DVD writer / reader
- Wall bracket for wall mounting
- Up to 2Gb RAM and 1000 Gb hard drive
- VoIP handset

## Kiosk Services

*Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.*

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature

modification and full bespoke kiosk design where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

---

## Monitoring

*Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.*

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

---

## Maintenance

*Even the most robust systems can suffer hardware failures or abuse.*

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
