

IBM ANYPLACE KIOSK

IBM ANYPLACE KIOSK EASY TO USE AND FLEXIBLE

The IBM AnyPlace kiosk has been designed for maximum ease of use and flexibility.

The sleek, compact design combines processor, flat panel touchscreen, MSR and scanner.

State of the art infra-red touchscreen technology gives greater flexibility and ease of use for the user.

A range of mounting options are available - tabletop mounts with a wide tilt range, flush to wall and articulated radial arms.

A wide range of peripherals can be attached to the AnyPlace kiosk, including a barcode scanner.

The IBM Anyplace kiosk has a range of mounting options including flush to wall and articulated radial arm.

Dimensions

- 15" model: W 368mm x H 326mm x D 72.8mm; Weight 6.4kg
- 17" model: W 402mm x H 368mm x D 78.3mm; Weight 8.3kg
- 19" model: W 441mm x H 399mm x D 82.8mm; Weight 9.3kg

Design

- 15, 17" or 19" infra red touchscreen technology.
- Available in sable and black as standard (other colours available on request)

Computer Specification

- Mobile AMD Sempron 1.8 GHz 3500+ (1 GHz FSB)
- AMD Turion 64 X2 TL-56 1.8 GHz Dual Core Mobile Technology (1GHz FSB)

Optional Extras

- Bar code scanner
- 4 GB Modular Flash Drive
- Integrated 3 track MSR
- 802.11b/g wireless support via mini PCI adaptor
- Branded backboard
- Flush to wall mount, tabletop tilt mount
- IBM AnyPlace POS Hub

Kiosk Services

Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature modification and full bespoke kiosk design

where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

Monitoring

Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

Maintenance

Even the most robust systems can suffer hardware failures or abuse.

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
