

METROPOLIS KIOSK

METROPOLIS KIOSK SLEEK AND MODERN DESIGN

The Metropolis is a step forward in simple and sleek design - the ultimate billboard self-service system.

This unit has the largest space for corporate branding. Its sophisticated design allows for an easy application of fully wrapped graphics and still has a compact footprint.

The Metropolis can hold almost any piece of equipment you might need. It comes standard with a single touch screen mounted above a large front panel.

This system can hold a laser printer with optional add-on rear body piece.

With its simple functionality, easy access and large branding opportunities, the Metropolis is one of our most cost friendly systems.

Dimensions

Without Keyboard:

- H 58.5 inches x W 19.5 inches (base 26) x D 20.5 inches (base 26)

With Keyboard and printer options:

- H 58.5 inches x W 19.5 inches (base 26) x D 23.57 inches (base 26.2). Height to keyboard: 35.91 inches

- Keyboard & Trackball
- Dual Monitor
- 17" Touch Screen LCD Monitor
- Privacy Glass
- Credit Card Reader
- 80mm Receipt Printer
- 8.5" Thermal Printer
- Custom Colors
- Body Graphics

Kiosk Services

Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature

modification and full bespoke kiosk design where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

Monitoring

Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

Maintenance

Even the most robust systems can suffer hardware failures or abuse.

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
