

OPTI-WALL KIOSK

OPTI-WALL STYLISH WALL MOUNTED KIOSK

This new compact, wall-mounted kiosk system, designed for indoor applications, is perfect if space is at a premium. Its stylish, refined design is sure to impress.

Despite the minimal dimensions of this system, there are a range of configurations available.

The Opti-Wall is available with touchscreen or keyboard and additional technology such as card readers can be installed.

There are also various colour options available.

The Opti-Wall kiosk's optional keyboard extends its range of applications

Optional Extras

- Magnetic Card Reader, SmartCard Reader
- Active sound system with 2 integrated speakers

Kiosk Services

Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature modification and full bespoke kiosk design

where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

Monitoring

Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

Maintenance

Even the most robust systems can suffer hardware failures or abuse.

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
