

## OUT-LINE KIOSK

# OUT-LINE EXTERNAL KIOSK RANGE SECURE & STYLISH

*These external kiosk terminals offer high levels of security and protection from climatic and physical conditions, and vandalism.*

The Out-Line Pro's (pictured right) curved roof structure, is both visually appealing and provides protection from the elements for both the terminal and its users. Inside, the enclosure may be configured with other components from the Rittal range of accessories, such as component shelves etc.

High brightness TFT displays ensure that information can be viewed in any conditions.

The Out-Line Wall unit (left) is a slimline wall mounted kiosk.

*The Out-Line Wall kiosk is a slimline wall mounted kiosk*

- IP55 Protection Rating

### Optional Extras

- Printer, magnetic card reader, smartcard reader
- Active sound system
- Membrane keyboard with touchpad, IP65 Stainless Steel keyboard with trackball

## Kiosk Services

*Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.*

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature modification and full bespoke kiosk design

where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

---

## Monitoring

*Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.*

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

---

## Maintenance

*Even the most robust systems can suffer hardware failures or abuse.*

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will

continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
